

Green Drain™

waterless urinal kit

The Green Drain Waterless Urinal Kit uses unique technology which is environmentally friendly and cost effective, reducing water consumption related to the use of urinals.

Two additional benefits of **The Green Drain Waterless Urinal Kit** are that it's very easy to install, and can be retrofitted to nearly all conventional urinals, without the need to replace the bowl.

The Green Drain Waterless Urinal Kit puts a stop to urinal flooding and provides a more hygienic environment. In essence, no water means there is no breeding ground for harmful bacteria.

The GD Waterless Urinal Kit has helped thousands of people solve the problem of urine odors, high maintenance, build up in plumbing and costs.
