PRODUCT DATA SHEET

CTX 108

Product Name:	CTX 108
D.A. Reg. No.:	L 7445
Product Type:	INSECTICIDAL AND FUNGICIDAL SURFACE TREATMENT FOR SEASONED TIMBER
Description:	CTX 108 is a ready-for-use organic solvent-based solution containing specifically blended insecticidal and fungicidal active ingredients that provides a colourless surface treatment for protection of seasoned timber against wood borer and termite attack as well as discolouring fungi and mould growth.
	CTX 108 contains a high level of insecticide to provide long term protection and also to control and eradicate wood boring insects in infested timber. On application, the organic solvent provides a degree of penetration of the active ingredients into the wood structure and ensures rapid drying on the treated surfaces. After drying, any coating/finish can be applied on the treated wood surface.
Active Ingredients:	Synthetic pyrethroid and organosulphur compound.
Physical Characteristics:	Appearance - Yellowish-brown transparent liquid Solubility - Aromatic solvents Density - $\pm 0,88$ kg/l Flammability - Highly flammable
Use Restriction:	Only to be used and applied in accordance with label warnings, precautions and directions for use.
Application:	Apply to clean, dry timber surfaces before application of a final wood coating/finish. Ensure that all surfaces are thoroughly covered by using either brush-on, dip or spray application methods.
Application Rate:	4 - 8m ² /l, depending on surface smoothness
Dilution Rates:	Ready for use. Do not dilute CTX 108
Storage:	Store in closed containers at temperatures below 40°C.
Packaging:	1l, 5l, 20l, 25l containers and 200l steel drums
Note:	Caution: Poisonous. Avoid ingestion, skin contact and prolonged inhalation of vapours. Thoroughly wash hands and contaminated skin with soap and water after use. Highly flammable. Avoid open flames.
