

FLUORESCENT PINK

FLUORESCENT TRACKING DUST

FOR USE ONLY AS A RODENT DETECTION AGENT

INSTRUCTIONS FOR USE

A product for use in rodent detection and movement in cases where the pattern of activity needs to be monitored.

A very small quantity of powder can be placed around the suspect area and can then be left overnight and the following day movement can be easily seen.

THIS PRODUCT IS ONLY RECOMMENDED FOR USE IN AREAS WHERE THE RESIDUE CAN BE EASILY CLEANED. CARE SHOULD BE TAKEN IN DOMESTIC SITUATIONS

In most cases the footprints left can be seen easily. The use of a fluorescent UV lamp can greatly increase the amount of movement that can be seen. In most cases any residue can be removed by washing with a suitable cleaning agent

First Aid Measures

General advice: Change contaminated clothing. No known symptoms to date.

Inhalation: Move victim to fresh air. Seek medical attention.

Skin contact: Thoroughly wash skin with soap and water.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Subsequently consult an ophthalmologist.

Ingestion: Rinse mouth. Do **NOT** induce vomiting. Seek medical attention.

This product is not classified according to EC regulation 1272/2008. For more detailed information see sds.
