NEW
Cockroach Gel

Easy to apply

Extremely palatable

New active ingredient

Tackles bait aversion

100% New recipe

Major species of cockroaches

Maxforce[®] Platin,
your partner in clean-out.

INTRODUCING MAXFORCE® PLATIN

- // Engineered for enhanced performance.
- // Cost effective.
- // Ideal for use in sensitive environments.
- // White formulation including blue bead attractant.

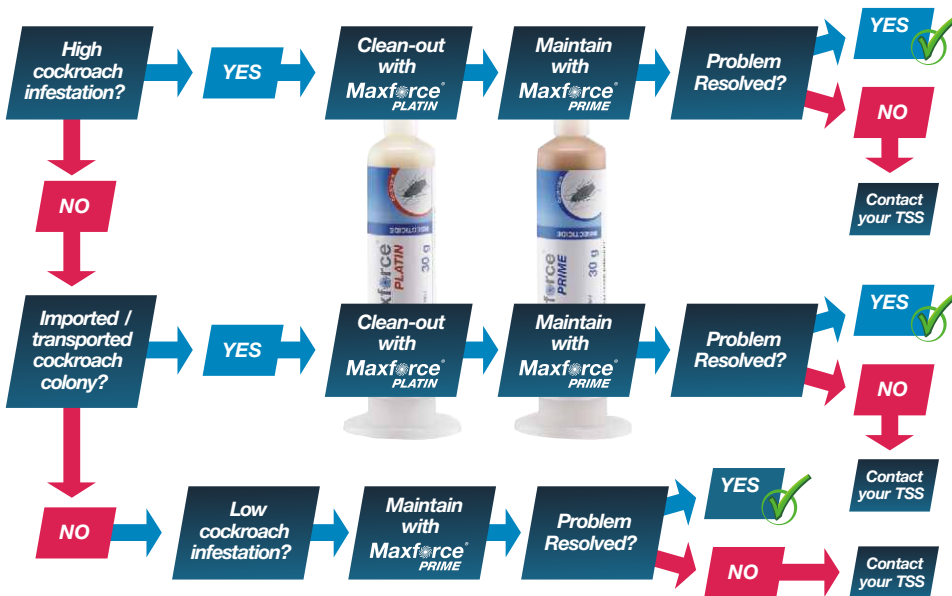

Residual Action: Replace gel after 12 weeks or sooner if required.

Packaging: 4 x 30 g syringe.

MAXFORCE® YOUR COMPLETE BAITING SOLUTION

- Maxforce® Platin should be used for rotational purposes as a good practice to prevent appearance of bait aversion.

Maxforce® Platin contains

MAXFORCE® PLATIN: DIRECTIONS FOR USE

(Suitable for use with most equipment. See product packaging for full details)

IMPORTANT: For optimal results, please use the recommended dose rate.

The lower application rate should be used for low and moderate German cockroach infestations or re-treatments. The higher rate should be used for more severe infestations of American and German cockroaches or first treatment. Numerous smaller placements will provide faster control than a few larger spots.

The gel will remain palatable for up to 12 weeks. Where infestations are high inspect gel four weeks after treatment and replace if necessary. Exposure to direct sunlight will reduce the effective life-span of the bait.

- Low infestation: cockroaches rarely visible during the day.
- High infestation: cockroaches commonly visible during the day.

PEST	APPLICATION RATE / m ²	
SMALL SPECIES German cockroach <i>(Blattella germanica)</i> 	3 mm diameter (0.25 g of bait)	3 mm diameter (0.25 g of bait)
	 1 Spot/m ² Low Infestation	 2 Spots/m ² High Infestation

PEST	APPLICATION RATE / m ²	
LARGE SPECIES American cockroach <i>(Periplaneta americana)</i> 	6 mm diameter (0.5 g of bait)	6 mm diameter (0.5 g of bait)
	 1 Spot/m ² Low Infestation	 2 Spots/m ² High Infestation
