MADE IN USA

Date manufactured: see container
Expiry date: see container
Batch No.: see container
UN No.: 3027

Product Code: 913023
072423/07-23

WARNING

HAZARD STATEMENTS:

- May be harmful if swallowed.
- May be harmful in contact with skin.
- May be harmful if inhaled.
- May damage fertility or the unborn child.
- May cause damage to organs (blood) through prolonged or repeated exposure.
- Very toxic to aquatic life with long lasting effects.

PRECAUTIONARY STATEMENTS:

- Obtain special instructions before use.
- Wash hands thoroughly after handling.
- Do not eat, drink or smoke when using this product.
- Avoid release to the environment.
- Do not handle until all safety precautions have been read and understood.
- Specific treatment (see first aid section and read label).
- Call a POISON CENTER/doctor if you feel unwell.
- Store locked up.
- Dispose of contents/container to local and national regulations. Never reuse container.
- Collect unused, spoiled or unconsumed bait and dead rodents and dispose of in a responsible manner.

INDICATIONS

Kills Rats and Mice.

SYMPTOMS OF POISONING

Symptoms of poisoning will generally take 3-4 days to develop. They include swelling, haematomas, bruising, nose bleed, lethargy, blood in the urine and/or faeces, possible bleeding from the eyes, and in extreme cases, shortness of breath due to the lungs filling with fluid.

FIRST AID TREATMENT

Call a POISON CENTER/doctor if you feel unwell!

General information: When in doubt or if symptoms are observed, get medical advice.

Following inhalation: No special measures are necessary. Provide fresh air.

Following skin contact: Wash with soap and water.

Following eye contact: In case of eye irritation consult an ophthalmologist. Rinse immediately carefully and thoroughly with eye-bath or water.

Following ingestion: IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.

IF SWALLOWED: Immediately call a POISON CENTER!

NOTE TO PHYSICIAN

Bromadiolone is an indirect anticoagulant. Phytomenadione, Vitamin K₁ is antidotal. Determine prothrombin times not less than eighteen hours after consumption. If elevated, administer Vitamin K₁ and continue until prothrombin time normalises. Continue determination of prothrombin time for three days after withdrawal of antidote and resume treatment if elevation occurs in that time.

DIRECTIONS FOR USE

USE ONLY AS DIRECTED! Handle with care.

USES: For use in the garden, home, by farming community, industries, pest control operators and public health.

IMPORTANT:

- Search for and burn/bury all rodent bodies, **do not place in refuse bins or on rubbish dumps.**
- Remove all remains of bait and bait containers after treatment and bury or burn.
- Empty containers completely and dispose of safely.

Poisonous to fish, birds and wildlife. Store away from food and feedstuffs. Keep in original container, tightly closed, in a safe place. Keep out of reach of children, uninformed persons and animals.

TOMCAT ALL-WEATHER BLOX is a rodenticide. It is weather resistant and may be used in both moist and dry areas. Rodents must consume the bait for 3-5 days to produce a delayed mortality (6-15 days). Replace stale, damp and mouldy bait with fresh bait. Placing in concealed locations where rats and mice feed unobserved is desirable.

RATS: Place 9 to 43 TOMCAT ALL-WEATHER BLOX

(usually at intervals of 5 to 10 metres) per placement.

Place bait in burrows and runways, along walls, or where rats are accustomed to feed. Maintain an uninterrupted supply of fresh bait for 10 days or until signs of rat activity cease.

HOUSE MICE: Place 1 to 2 TOMCAT ALL-WEATHER BLOX

at intervals of 2-4 metres per placement, where mice or their signs have been observed. Maintain an uninterrupted supply of fresh bait for 15 days or until signs of mouse activity cease. Place bait in such a way that it is inaccessible to animals, birds and children or sheltered by loose boards or tiles.
