

ADVION® WDG

THE ADVION BRAND YOU TRUST IS NOW SPRAYABLE

FUNCTIONALITY AND FLEXIBILITY IN ONE

Advion® WDG insecticide is a sprayable formulation of the trusted Advion brand that is labeled to control a broad range of targeted insects including large-colony ants, cockroaches, pantry pests and termites. Its formulation can be used in multiple ways across commercial and residential accounts to help add convenience and flexibility to your service offerings:

- ▶ **Food-handling establishments:** spot or crack-and-crevice treatment as directed by the product label, even when the facility is in operation
- ▶ **Indoors:** spot or crack-and-crevice treatment
- ▶ **Outdoors:** 10-ft. perimeter band

-  **Versatility** – can be used in commercial areas, including food-handling establishments, and in residential areas
-  **Reliable control** – powered by the trusted active ingredient *indoxacarb* to control a broad range of pests for up to 60 days
-  **Peace of mind** – its MetaActive™ effect differentiates between target insects and non-target organisms
-  **Convenience** – a non-repellent, non-pyrethroid and non-neonicotinoid formulation that can be applied as a spray or foam, indoors and outdoors

AN EFFECT THAT ONLY TARGETS INSECT PESTS

Advion® WDG is formulated with a MetaActive™ effect so it only affects targeted pests, and non-target organisms are less likely to be affected.

Target Insects

Upon entering an insect, *indoxacarb* is converted into a new molecule with insecticidal properties. This process is activated specifically by the insect's own enzymes.

Non-target organisms

The bioactivation process is not as efficient within most non-target organisms, so they are less likely to be affected by the product.

A POWERFUL SOLUTION FOR COMMERCIAL ACCOUNTS

Advion® WDG offers added convenience for commercial accounts. It can be applied:

- ▶ While commercial facilities are open without disrupting operations
- ▶ In food-handling establishments as directed by the product label
- ▶ Within transportation equipment such as trains, boats and buses

PROVEN CONTROL OF PROBLEMATIC PESTS

Residual efficacy against tawny crazy ants and pharaoh ants on porous plywood*

*For best results, use a low concentration and high water volume application. Advion® WDG can be tank-mixed with other insecticides, such as Demon® Max insecticide, for quick knockdown.

Source: PPMG18303 and PPMG18304, 2018. Advion® WDG applied at 0.10%. Trials conducted on porous plywood to assess residual control.
